SOLUTION FOR ACCESSIBILITY  
MANAGEMENT

The Accessibility Management Solution

## iCOMPLY IS THE LEADING INTEGRATED SOLUTION FOR ACCESSIBILITY MANAGEMENT

iCOMPLY will ensure the accessibility and usability of your websites and intranet, increase revenues and reduce overheads, enhance the morale and productivity of your staff, as well as reduce your corporate exposure to legal risk and associated costs.

- The Equality Act and Disability Equality Duty require that you accommodate disabled customers and employees in all your products and services.
- Government and industry research has shown that accessibility can represent an almost doubling of on-line revenue and a significant increase in staff productivity and retention.

Every organisation should, by law and legal imperative, have a website and intranet that is accessible, as well as a customer service and employment strategy that is similarly inclusive. Do not be left behind while others embrace the inclusive agenda.

AbilityNet provides a package of services that covers every aspect of your disability requirements.

iCOMPLY takes AbilityNet's expertise and helps you realise accessibility best practice in:

- Your internal e-strategy, policies and technical guidelines - including conformance to the new British Standard BS 8878
- Your website(s), intranet and internal systems - including our accessibility accreditation trustmark
- Your documents - including PDFs and email communications
- Tools, technical training and persona development for web teams
- Workstation access technology and reasonable adjustment

iCOMPLY also includes an award winning disability resource 'My Computer, My Way' - already implemented by companies such as Sky ([www.sky.com/accessibility](http://www.sky.com/accessibility)) and the BBC ([www.bbc.co.uk/accessibility](http://www.bbc.co.uk/accessibility))

iCOMPLY is a single, comprehensive solution helping you to respond to the challenge of accessibility, efficiently and cost effectively across your organisation.

iCOMPLY means that your organisation can:

- Access professional support from a single source to help you gain and maintain accessibility across all areas of your e-estate
- Reduce the threat and impact of litigation for non-compliance
- Benefit from the significant increase in revenue and decrease in cost represented by accessibility compliance
- Promote your market-leading compliance to enhance your brand

AbilityNet's iCOMPLY solution is a comprehensive process which firstly addresses the accessibility of your organisation, and then ensures that this level of compliance is maintained.

**"As a public service website, our goal is to ensure that we serve all our users; with AbilityNet's help we are making this objective a reality both now and into the future."**

**Head of Usability and Accessibility,  
BBC Future Media & Technology**

After an initial evaluation, the iCOMPLY specialist team will identify the optimal roadmap to achieve accessibility and then support you through every step of the process - to compliance and beyond.

iCOMPLY works in partnership with your IT department, meaning that changes are readily implemented within your existing systems, and ensuring that they provide the level of accessibility and reasonable adjustment required.

iCOMPLY also features the option to implement the market-leading e-governance solution 'Compliance Sheriff'.

**"I have been really impressed with the depth and quality of AbilityNet's reports and their focus on practical solutions. I would definitely recommend AbilityNet to other organisations, as much for the quality of their recommendations as the sensitivity they demonstrated."**

**New Media Content Manager,  
British Museum**

Compliance Sheriff is an enterprise management solution that greatly facilitates accessibility maintenance. It also protects your organisation from breaches in:

- Privacy – the unintentional disclosure of PII (Personally Identifiable Information) such as user account and credit card information
- Security – including the unauthorised posting of sensitive data such as restricted or embargoed information
- Brand integrity - the ability to cleanse outdated brand information (such as old logos or product names) and prohibit any future publication

From your websites, through internal systems and external communications, to training and customer service, iCOMPLY is the only service your organisation needs.

With iCOMPLY you will achieve compliance with confidence.

The Accessibility Management Solution

**iCOMPLY** is brought to you by:

AbilityNet – the UK's leading experts on e-accessibility and digital inclusion for people with disabilities - [www.abilitynet.org.uk/icomply](http://www.abilitynet.org.uk/icomply)
